Vintage sounds for Kurzweil KDFX synthesizers

They scream, spit, bite and growl - here come the best selfmade vintage sounds for your Kurzweil synthesizer. No digital sound, but a real warm tube amp distortion with a way cool Leslie. In other words the ideal combination for Blues, Jazz, Funk, Soul, Latin and smooth music.

Unfortunately this is not the latest version of my sounds, because I do not have a floppy disc for backup any more - todays PowerMacs ship only with a Superdrive. Those sounds were recorded in december 2001. Vintage enough? Then try out the .mp3 files or just download the .zip3 archive for your baby.

If you also have done some great sounds for your Kurzweil, please contact me.
