## TaX Developer Cookbook for the iPhone

While technology is always improving, I'll write down my notices to keep on track. In my current cookbook I cover new technologies concerning the iPhone.

The current version of the cookbook is more like a better scratchpad while engineering for the smart iPhone OS. Feel free to download the PDF document. This is work in progress, so stay tuned for more updates.

The cookbook started as a simple text file, but grew with the great LaTeX support on Mac OS X. This is why TaX has this camel case typography. Enjoy.
